Decoration Design App

Authors: Evan Trauger, Kelvin Iriarte, and Zephanae Liis

Problem Statement

Shoppers are decorating their house for the holidays and are not sure how the decorations they are considering buying will look like in their house. This app will allow the user to view how the decorations will look in their house.

Who is experiencing the problem?

People that are decorating their house.

What is the problem?

Many people buy decorations without first knowing how they will look in their house, potentially leading to them buying decorations that don't match the decorations they already have.

Where does the problem present itself?

The problem comes from people buying decorations that don't match the room or the decorations they already have up, making the room look tacky.

Why does it matter?

Being able to view beforehand what decorations someone is considering buying will allow them to avoid buying the wrong decorations and save them hassle and money.
